

Hi there,

I'm reaching out because I'm excited about the opportunity to join your team in a role where I can solve problems, build solutions, and drive innovation.

Over the past 8 years, I've focused on automating workflows, streamlining deployments, and securing systems in dynamic environments.

Whether it's designing CI/CD pipelines, building cloud infrastructure, or simplifying security integrations, I enjoy finding creative ways to make things work better, faster, and safer.

A bit about me: I thrive in spaces where big ideas meet hands-on execution, and I'd love to bring that mindset to your team.

Let me know if there's a chance to chat—I'd be excited to explore how I can contribute to your organization.

Thanks for your time!

Best regards,

Jose Eden
